

How to Use the teachable iOS App

Downloading the iOS App

1. Go to the App Store on your device.
2. Search for **Teachable** (or [click here](#)).
3. Click the **Get** button. Click **Install**.
4. Enter your Apple ID password or Touch ID if prompted.

Using the iOS App

1. Open the app by selecting the Teachable icon from your homescreen.
2. In the login screen, enter the email address and password associated with your Teachable account.
3. You will be brought to all your current school and course enrollments.
4. Select the course you wish to view, which will bring you inside the course area, where you can start to work through lecture content.

Troubleshooting & FAQ

Why don't I see a course?

If the school is visible in your Teachable Accounts dashboard, it should be visible in the app, but remember, you cannot access courses from schools that do not have Teachable Accounts enabled.

Why can't I register?

You cannot register for courses from the iOS app.

How can I adjust the video playback speed?

Go to Settings, under Playback Speed.

How can I log in to another account?

To log in to another account, visit Settings in the app. Click Sign Out. Then log in with your other account.

Why is my login failing?

Make sure you have entered in your email and password correctly—keep in mind that passwords are case-sensitive. If the issue continues, reset your password from a web browser, and then try to log in to the app again.
